What difference will the improvements make?

- We will be more aware of our skills and why we need them for our future.
- We will understand what equality and diversity is and why it is important to be in an inclusive culture.
- We will all feel understood and respected.
- We will all have a shared sense of belonging to the school and all know what the school vision, values and aims are and what they mean.
- We will have more confidence in our ability in maths and we will know where we are in our learning and what we need to do to get better. We will have a range of strategies that we could use when solving calculations and problems.

Improvement Priority 1

“Skills for Learning, Life and Work”

- How do we help you to develop skills that will be useful when you join the world of work?
- Pupils, parents and staff will create a list of skills (framework) that we think are important for you to get better at.
- We want you to be able to talk about what skills you already have.
- We want you to be able to talk about skills you need to develop and how to do this.
- We are going to work with other local schools on a project to help you to build your skills.

Improvement Priority 2

“Equalities and Diversity”

- We want everyone to feel included and have their differences respected.
- We will have equality and diversity lessons within our Health Lessons so we can understand what it means.
- Families will be involved in learning about what the school are promoting.

Improvement Priority 3

“Developing our Vision”

- We will all have contributed to deciding on the schools vision, values and aims.
- We will know what the vision, values and aims mean and how this reflects what we do in the school.
- We will work through the 'How Good is OUR School?' document so we can have a say in how well our school is doing and how it can be improved.
- The staff will also evaluate the school and identify where we are and where we need to go.

Improvement Priority 4

“Numeracy”

- We will do assessments in maths so we know where we are and what we need to work on.
- The staff will learn new strategies and ideas for teaching us new concepts.
- Pupils will work on new ways for answering sums.
- We will be asked questions to help teachers know if maths lessons are working well.
- We will be getting help from Numeracy Development Officers who will come into the school to work with the teachers and us.

“Learn today for a brighter tomorrow and be your best self!”
